

# PRIMARY LEVEL FIELD TRIP (BASIC)

## Your Eye Care Learning Journey

We are delighted to present to you **Primary Level Field Trip Program** for primary school students. We would like to invite you, teachers, students and parents to this 2.5-hour program that allows you to discover more about the eye and vision.

How does the eye see? Which parts of the eye facilitate your visual experience? How do conditions like short-sightedness and astigmatism interfere with your visual experience?

These are questions that the students will be able to dive into as they come with us on this adventure in discovering the workings of the eye. Beyond the good eye care habits you have learnt, you will ultimately gain an understanding of the basic structures and functions of the eye, and learn more about ways you can preserve your eye health for the future!

**2.5 hours Guided Program**  
Time slot: 10am to 12.30pm  
or 2pm to 4.30pm

**Designed for Primary Level students.**  
Recommended 15 to 35 kids per session.

**\$20 per student/adult**  
(incl. 7% GST)

**Mondays to Saturdays**  
except PH (subject to availability, bookings are necessary)

**Call: 6471 1771**

# HIGHLIGHTS OF THE PROGRAM

## Visual assessment

Students will experience basic visual screenings that will provide more insight on their visual status. Whilst the eye screenings do not replace a comprehensive eye examination, this is useful in alerting parents of issues that require early attention. This is important as uncorrected poor vision and poor eye coordination may impede a child's learning, especially when it occurs in their formative years.

## All about eyes!

Learn about the eye in greater detail such as; structures of the eye and its functions, how light enters the eye, importance of having two eyes, good eye hygiene, eye protection, impact safety and the different types of optical corrective aids.

## Interactive activities!

Students will get to explore the various eye components and discover how they all work together. Engage in age appropriate hands-on activities, which enable the students to apply learnt knowledge.
