

PRIMARY LEVEL FIELD TRIP (INTERMEDIATE)

Your Eye Care Learning Journey

We are delighted to present to you **Primary Level Field Trip Program** for primary school students. We would like to invite you to this 2.5-hour program that allows you to discover more about the eye and vision.

How does the eye see? How do our eyes adjust to the dark? Find the blind spot. How do conditions like short-sightedness and astigmatism interfere with your visual experience?

These are questions that students will be able to explore and experience during the program. They will also gain knowledge of the status of their own eyes, and claim ownership over the care of their eyes so they may cultivate good visual habits in their every day lives.

2.5 hours Guided Program
Time slot: 10am to 12.30pm
or 2pm to 4.30pm

Designed for Primary Level students. Recommended 15-35 kids/session.

\$25 per student /adult
(incl. 7% GST)

Mondays to Saturdays
except PH & Sun.
(subject to availability,
bookings are necessary)

Call: 6471 1771

HIGHLIGHTS OF THE PROGRAM

Visual assessment

Students will experience a basic vision assessment that will provide more insight on their visual status. Whilst these eye screenings do not replace a comprehensive eye examination, this is useful in alerting parents of issues that require early attention. This is important as uncorrected poor vision and poor eye coordination may impede a child's learning, especially when it occurs in their formative years.

All about eyes!

Our eyes are a complex part of our body. This program enlightens students about their sense of sight – how they see and how their vision can change over time. They will also learn the appropriate ways to protect their eyes and preserve their eye health for the future.

Interactive activities!

There will be various games, activities and demonstrations that allow students to understand more fully how their eyes work together and how their eyes come to see.
